# Fireworks by Jubilee

## Why Fireworks?

The fun and excitement of fireworks appeals to all ages. If you are planning a wedding or any kind of important celebration, there is no better way to provide spectacular entertainment for your guests and make the occasion truly memorable.

A creatively designed fireworks display will capture the attention of your audience from start to finish. No other form of entertainment will provide such excitement, appeal, and value for money.

The Perfect Way to End the Day

## Why Jubilee?

Jubilee Fireworks are one of the leading suppliers of fireworks displays in the UK. From weddings and private parties to major international events, our award winning shows continue to thrill audiences throughout the world. In recent years, we have gained first prizes in both major British competitions - for both musical and non-musical fireworks displays.

What makes a Jubilee display different? Perhaps the key element is our attention to detail; from the first enquiry to the final performance, we strive to exceed the expectations of every client. We perceive a fireworks display to be a work of art. Each display is designed to convey the fireworks to their very best effect, with carefully selected colour sequences, an exciting sense of rhythm and spectacular aerial sequences.

Our vast repertoire of pyrotechnics is such that you can select from a wide spectrum of firework colours to match the occasion – a ruby anniversary, or a violet and silver colour themed wedding, for example.

With a range of displays to suit every budget and occasion, Jubilee Fireworks offers the ultimate in pyrotechnic entertainment. The artists and technicians whose work in recent years has delighted countless people are ready and waiting to bring their talents and enthusiasm to you.

All of our displays are meticulously designed to ensure maximum spectacle and artistic use of the surroundings, incorporating a wonderful variety of effects.

# Pyro-Musical Displays

Pyro-musical displays, in which the firework effects are expertly choreographed to a musical sound track, are very popular with our wedding clients. Experience the thrill of seeing fireworks performing to the music of your choice. It's the ultimate personalized display!

This service includes the supply of an outdoor sound system and engineer, and a special electronic ignition system to ensure that the fireworks match the music perfectly. Our award-winning design skills ensure a breathtaking show at a very reasonable price. Your guests will be astonished.

Fees for pyro-musicals commence at £150 per minute of display time, with a minimum overall budget of £1000. Most wedding pyro-musicals last between 7 and 10 minutes, and may include up to three songs. Tell us which pieces of music you would like, and leave the rest to us!

## Magic Lanterns

Magic Lanterns are something different! Ideal for venues where noisy fireworks are unsuitable, or a graceful way of starting any display.

Working on the principle of the hot air balloon, these giant illuminating lanterns rise gently into the sky and are carried upwards to a great height. They look wonderful when launched *en mass* and create a magical moment that will remain long in the memory.

We can provide a complete stand-alone lantern launch, or offer them as a mesmerising addition to a fireworks show. You won't be able to take your eyes off them as they drift away into the night sky.

## Electric Avenue

Can you imagine walking or driving through an avenue of fireworks, with gorgeous silver sprays highlighting the route? This beautiful effect (which we call 'electric avenue') can be created, for example, as the bride and groom leave the venue at the end of the reception.

## Encore

Would you like your show to end in real style? Our Encore will take your firework experience to the limit. It's difficult to top our finale sequence, but when the applause has died down, why not add the ultimate finishing touch - a sky full of glittering golden rain that will draw gasps from your audience. Available as an optional extra for all display packages. The ultimate thrill (suitable for larger sites only).
